BROADBAND ACCESS

What is it...?

TriCounty Telecom offers High Speed Digital Subscriber Lines (DSL), goFAST DSL, in its three telephone exchanges (964, 935 and 927). goFAST DSL is an always on Internet access service that provides speeds up to ten times faster than traditional dialup. It allows users to surf the Net and talk on the phone at the same time. Since you are always on, you are always connected to your favorite web sites, email, instant messaging and much more.

Imagine being able to browse the Internet without having to wait for your computer to connect. With the new wireless technologies available in the market, you can relax in your favorite chair and surf your high speed network from anywhere in your house. Don't let the Internet slow you down. Choose a broadband package that fits your needs and goFAST today.

DIALUP ACCESS

What is it...?

Dialup Internet Access allows users to dialup and connect to the Internet at 56K speeds. If you are able to call the Pinetown exchange of 927 without incurring additional charges, this service can work for you. Call us today, and we will check for availability in your area.

NEW—Use our FREE enhanced goFAST Accelerator and you can receive even faster speeds. The goFAST Accelerator uses compression and caching techniques to minimize file size and the distance files have to travel to reach you from across the Internet. This state-of-the-art technology is available FREE to all TriCounty Telecom Internet users.

Unlimited Dial-up Access.....\$19.95

Initial set-up.....\$15.00

COMPARE

DON'T BE FOOLED

You Get The Best Internet Service
When You Find The Best Balance Of
Five Features

- 1 LOW PRICE
- 2 HIGH SPEED
- 3 DEPENDABLE SERVICE
- 4 THE LATEST SOFTWARE
- 5 FULL SUPPORT

WE HAVE IT!

Don't be fooled by offers and gimmicks that promote an extraordinary deal on one feature or free promotions that don't always turn out.

Compare the details of our features with anyone else's, and you'll find out why we are the best Internet Service Provider in this area.

Get all your local and national news, local movies, TV listings, classifieds and more from our FREE community news site www.goTriCounty.com.

KNOW YOUR OPTIONS

1 LOW PRICE

Some ISP's may APPEAR to be cheaper or to offer more "minutes per dollar," but watch out. The big question is: Do they have the resources to keep adding equipment as their customer base grows? It may be just a matter of time before all of your ISP's capacity is taken up — and all you get are BUSY SIGNALS or SLOW SERVICE.

No "busies" with us! Our dialup plans offer more hours than most users need to enjoy all the Internet has to offer. Plus, we have the resources and the commitment to add modems and servers as needed.

2 HIGH SPEED

Everything on the Internet is moving faster to accommodate exciting new graphics, sound and video.

Slow modems can't keep up. And ISP's that can't afford to upgrade to handle the latest speeds will leave you bogged down in a slow-motion world. It won't happen with us.

We support traditional dial-up connection speeds up to 56 kbps with Flex technology as well as broadband speeds up to 1.5Mb. With our CISCO powered Network, we have the backing to give you the quality and performance you deserve.

3 DEPENDABLE SERVICE

Compare the dependability of our service with any other ISP. Our major arteries to the Net are multiple OC-3s. If one OC-3 is cut or down-graded, connections are rerouted instantly. No one is more reliable or faster.

Our multiple servers and routers are each supported with uninterruptible power supply and back-up devices, all monitored 24 hours a day—by highly qualified engineers.

4 THE LATEST SOFTWARE

When you sign up with us, you receive all necessary connection and navigation software, as well as email software. At no additional charge, we help protect you from Junk Mail and unwanted Viruses!

We offer frequent upgrade options as newer versions of our software become available on the market.

5 FULL SUPPORT

We provide a full-service technical support Help Desk open 24 hours a day, 7 days a week! Call 927-TECH!

You may dial in toll-free to get help with any connection or navigation problem, and our courteous and knowledgeable technicians will guide you to a solution.

It won't take long either. The average "hold" time to reach our Help Desk is less than two minutes because we employ more agents per 100 customers than many ISP's—3 times more!
