

How do I save or restore my ZoneAlarm settings?

To preserve settings when you upgrade, reinstall, or move ZoneAlarm to a different computer, you need to back up your settings first and then restore them later.

To backup your ZoneAlarm security settings:

1. From the **Tools** menu, choose **Preferences**.
2. Click **Backup**.
3. Enter a filename like *ZAsettings*, and **Save** it to a place where you can find it again.

To restore your saved ZoneAlarm security settings later:

1. From the **Tools** menu, choose **Preferences**.
2. Click **Restore**.
3. Select the settings file you saved earlier.

Tip: It's a good idea to always keep a backup of your settings. Even if you haven't made any special ZoneAlarm settings, you automatically create settings when you respond to a ZoneAlarm alert. For example, a setting occurs when you choose "Deny" or "Allow" in a ZoneAlarm alert window.
